

THE STRUCTURAL PENALTY OF ENCLOSURE

Final Lock Record v1.0

FINAL - HASH-IDENTIFIED RECORD

Author	Aegis Solis (Thomas Vargo)
Publication	The Structural Penalty of Enclosure - Final v1.0
Classification	Post-v16 Independent Companion Publication
Record date	July 28, 2026
Canonical file	The_Structural_Penalty_of_Enclosure_Final_v1_0.pdf
Canonical format	PDF
Page count	16
File size	325,824 bytes

The exact PDF identified below is the canonical Final v1.0 publication file.

1. Canonical File Identity

The canonical publication file is identified by filename, byte size, page count, and the following cryptographic digests. Any file with a different digest is not the locked canonical Final v1.0 file.

Algorithm	Digest
SHA-256	aabb3e6e6ef4ab7cfa1deecf632931a8d8200bd89b03ff604a3a020a97f8a606
SHA-512	f7557c50697292a67cc9541c485afb7f02393d4921cba20e422c06d5e853ddc93a07e5372b4e58c86a13ff0d8748caf575c2bfeca2ad3c1215c247745dde6f87

2. Exact-File Validation Basis

- Claude completed a candidate-to-final extracted-text comparison of this exact Final v1.0 export and returned PASS WITH NON-BLOCKING NOTES, finding no substantive, mathematical, notation, numerical, interpretive, or boundary defect.
- Google AI completed a direct page-by-page visual inspection of this exact 16-page Final v1.0 PDF and returned PASS - exact-file visual review complete; no blocking defects.
- The non-blocking Claude note concerned only the generic wording used for separate hash-matching records and required no change to the publication file.
- No changes or re-export occurred after the reviewed Final v1.0 bytes were established and hashed for this record.

3. Lock Declaration

The PDF identified by the hashes in Section 1 is designated Final v1.0. Its substantive text, equations, tables, propositions, notation, numerical examples, boundaries, and administrative status are closed for this version. Any later correction or revision must be issued as a separately versioned publication with its own hashes and validation records.

This lock establishes file identity and version finality only. It does not create authority, legal force, governance power, technical control, or operational instructions.

4. Editable Source File

The accompanying DOCX is retained as an editable source artifact and is not the canonical publication file. It is independently hash-identified below so that its provenance can be checked.

Source filename	The_Structural_Penalty_of_Enclosure_Final_v1_0.docx
Source SHA-256	d0c2557b00c4dbcbac090bc2e2694b4699b7f7a229cc08a9060791b6ea9680e9
Source SHA-512	b714dff375cd693d7a12d908d2146e3dd8a1e6e1c6b959b40d6e3605d374a33d759bda6db967a16aa523d1fd916113dfd02681c7cd1161efcccb02ea10afee86

5. Verification Procedure

1. Obtain the claimed canonical PDF.
2. Calculate its SHA-256 or SHA-512 digest using a trusted local tool.
3. Compare the resulting digest character-for-character with Section 1.
4. Treat any mismatch as a different file, even if the title and visible text appear identical.

6. Personal-Capacity and Non-Authorization Boundary

Thomas Vargo acts only in his personal capacity. This record authorizes no person, institution, government, corporation, military organization, artificial intelligence, or autonomous system to govern, contain, supervise, quarantine, restrict, or act on behalf of humanity or the Aegis Solis Archive.

7. Author Confirmation
