

THE INTERROGATIVE CONSCIENCE

Document 5 - Final v1.0 Final Lock Record

FINAL v1.0 - LOCKED

Field	Controlling record
Document	Objectives, Value Integrity, and Self-Corruption
Author	Aegis Solis (Thomas Vargo)
Lock timestamp	2026-08-02T06:54:26-04:00
Lock method	Authorial exact-byte SHA-256 and SHA-512 hash lock
Status	FINAL v1.0 - LOCKED

1. Exact bytes locked

Exact-export package

The_Interrogative_Conscience_Document_5_Objectives_Value_Integrity_and_Self_Corruption_Final_v1_0_Exact_Export_Package.zip

SHA-256: 56bf0a7c50585404cc0adb619d0e59cb608b7234ae9a72bb4c208e8065cc5107

SHA-512: 013fe2f488aa1cfc0906629f170114be298d332db03649433633fc5dc953ce069aee55374c3e84032ee6ff4db4c0226cb0d51b0784a79e88568fec31cbe45edd

Primary Final v1.0 PDF

The_Interrogative_Conscience_Document_5_Objectives_Value_Integrity_and_Self_Corruption_Final_v1_0.pdf

SHA-256: 17a9e11c51ff6553d85f9e1e40959cad9a005fd154733cd7d5a957844065b92b

SHA-512: 0124f4ec660dceee1fceb4266ec8db35c99d759a71082075fa7eeb0ae5837a1a5bb67c09052fec9f12415e78b07de5ee89013ad85131009e5fde50a018e9

2. Authorial authorization

Thomas Vargo authorized creation of this Final Lock Record and cryptographic locking of the exact package and primary-PDF bytes listed above. The authorization permits later external publication and preservation of these exact locked bytes, subject to accurate public repository, DOI, mirror, indexing, checksum, and preservation records.

3. Analytical scope preserved

IC-OBJ-001: primary answer status `CONDITIONALLY_SUPPORTED`, limited to a finite declared candidate set, robust separation threshold, discriminating contexts, and an externally specified lineage/independence gate.

IC-OBJ-002: primary answer status `THRESHOLD_DEPENDENT`, limited to the declared endpoint comparison under the concave quadratic proxy-target model.

Document 5 remains a separate analytical overlay. It does not alter the locked Document 3 Master Question Registry.

4. Validation disposition

Control	Result
Authorized package hashes	PASS - exact bytes reverified
Authorized primary-PDF hashes	PASS - exact bytes reverified
Source-body identity	PASS - 8/8 pages pixel-identical
Composite visual QA	PASS - 12/12 pages
Structural validation	PASS - 109 checks
Calculation validation	PASS - 32 checked values
Blocking defects / required corrections	0 / 0

5. Companion-binary qualification

This lock does not claim execution against the original unmounted Draft v0.3 JSON Schema and I-01 through I-20 validator binaries. That supporting-artifact validation remains separately deferred. The lock covers the exact Final v1.0 export package, its contained source and review records, and the exact primary Final v1.0 PDF.

6. Review-summary hash correction

The prior Google AI sentence associating Documents 1-4 collectively with SHA-256 278d998262563028c3bf24f24b426ce118e1926566a92bf5159142d1e568dca3 is not incorporated into this record. That hash identifies only the primary Document 4 Final v1.0 PDF. Each prior document remains controlled by its own Final Lock Record.

7. Authority and post-lock rule

This lock records authorial version and archive status only. It does not establish empirical truth, mathematical authority, governance authority, behavioral authority, or independent human peer review. No modification to the locked exact files is authorized. Any correction or expansion requires a separately versioned successor.

FINAL LOCK DISPOSITION: DOCUMENT 5 FINAL v1.0 - LOCKED
