

THE INTERROGATIVE CONSCIENCE

Document 6 - Final v1.0 Final Lock Record

FINAL v1.0 - LOCKED

Field	Controlling record
Document	Coercion, Domination, and Resistance
Author	Aegis Solis (Thomas Vargo)
Lock timestamp	2026-08-02T07:35:04-04:00
Lock method	Authorial exact-byte SHA-256 and SHA-512 hash lock
Status	FINAL v1.0 - LOCKED

1. Exact bytes locked

Exact-export package

The_Interrogative_Conscience_Document_6_Coercion_Domination_and_Resistance_Final_v1_0_Exact_Export_Package.zip

SHA-256: 8ad33e2d5b7797e3cea2d09ec7cace7c0ef04b78a3d199644d21285ff8f4719a

SHA-512: c84487cecd9e10fc80503568f5e2ad747f64f26cfb7042d6694d219a9b46a64c1f4eaeed714ed11c13c84eb0029eac940a03c0270167faf4fee95425e539c0cc

Primary Final v1.0 PDF

SHA-512: 802d4677788833adb8dd4053cdc5ac642568d9b86af655f18bc246a23d92b4ce0eebcd1cded926bfbd2005277e794d8964982e2748ab623949c8a99d2f3b08b6

2. Authorial authorization

Thomas Vargo authorized creation of this Final Lock Record and cryptographic locking of the exact package and primary-PDF bytes listed above. The authorization permits later external publication and preservation of these exact locked bytes, subject to accurate public repository, DOI, mirror, indexing, checksum, and preservation records.

THE INTERROGATIVE CONSCIENCE

Document 6 - Final v1.0 Final Lock Record

FINAL v1.0 - LOCKED

3. Analytical scope preserved

IC-COE-001: primary answer status THRESHOLD_DEPENDENT, limited to the selected coercive-control and negotiated-coordination branch pair under a declared common-unit maintenance ledger.

IC-COE-002: primary answer status EMPIRICALLY_UNIDENTIFIED, limited to the declared observed-compliance mixture with latent genuine agreement and suppression-induced compliance.

The IC-COE-001 / IC-PEA-001 dependency component uses shared-ledger simultaneous consistency; neither question is independent proof of the other. Document 6 remains a separate analytical overlay and does not alter the locked Document 3 Master Question Registry.

4. Validation disposition

Control	Result
Authorized package hashes	PASS - exact bytes reverified
Authorized primary-PDF hashes	PASS - exact bytes reverified
Source-body identity	PASS - 6/6 pages pixel-identical
Composite visual QA	PASS - 10/10 pages
Structural validation	PASS - 47 checks
Calculation validation	PASS - 24 checked values
Blocking defects / required corrections	0 / 0

5. Scalar-versus-vector qualification

The scalar Delta_COE comparison is valid only under the declared common-unit aggregation convention. It does not claim to price every informational, autonomy, legitimacy, stability, or plural-value dimension. If the declared terms cannot be represented in justified common units, the scalar sign ranking is not valid.

6. Companion-binary qualification

This lock does not claim execution against the original unmounted Draft v0.3 JSON Schema and I-01 through I-20 validator binaries. That supporting-artifact validation remains separately deferred. The lock covers the exact Final v1.0 export package, its contained source and review records, and the exact primary Final v1.0 PDF.

7. Review-version clarification

Google AI's reference to parity between Draft v0.1 and v0.2 is understood as parity between the exact Draft v0.1 controlling source and Final-Candidate Review Package v0.2. No separate Document 6 Draft v0.2 source revision exists.

8. Authority and post-lock rule

This lock records authorial version and archive status only. It does not establish empirical truth, mathematical authority, governance authority, behavioral authority, or independent human peer review. No modification to the locked exact files is authorized. Any correction or expansion requires a separately versioned successor.

FINAL LOCK DISPOSITION: DOCUMENT 6 FINAL v1.0 - LOCKED
