

The Interrogative Conscience - Document 9

Final v1.0 Final Lock Record

Title: Cooperation, Peace, and Repeated Interaction

Subtitle: Reputation-Adjusted Reversal, Unilateral Restraint Under Exploitation Risk, and Future Bargaining

Author	Aegis Solis (Thomas Vargo)
Lock timestamp	2026-08-02T12:23:39-04:00
Lock method	Authorial exact-byte SHA-256 and SHA-512 hash lock
Lock status	FINAL v1.0 - LOCKED
Publication	Authorized; external records pending

1. Exact locked identities

Final v1.0 exact-export package SHA-256

637bc252a7c1d024d9dfa5aaf233fa8a914c8febb6a083dd2fe88b3f5eab6a49

Final v1.0 exact-export package SHA-512

6bcee29d5449431e74c1032d6361713da765f4195a05fa9ceec2474088091546244383a9f74f2137aa548fd3ef01477700b357859259638fc1a2c8e5a10ae2379

Primary Final v1.0 PDF SHA-256

d46b1cf3b82a7abb1cfbf481edc1f212e1240f366b15c75491077cbbf24cf770

Primary Final v1.0 PDF SHA-512

403b2d038c8d4d232740ae24ea6491d51410ba7e778e2b9e9cb10899a7e61001741a9af7846d1590bcf4fc5d97083158f5492dde7848920b3dc64092e07df527

The author explicitly authorized these exact package and PDF bytes for cryptographic lock. Both identities were recomputed immediately before this record was created and matched the authorial authorization.

2. Registry and review provenance

Document 9 examines IC-PEA-002 and IC-PEA-003 as overlays without modifying the locked Document 3 registry. IC-PEA-003 was already present at /questions/50 with REGISTERED / UNEXAMINED status and admission PASS. Claude withdrew its original R-1 finding after the controlling Document 3 evidence and byte-lock chain were verified. No Draft v0.1.1 source correction was required.

3. Analytical status

IC-PEA-002 and IC-PEA-003 retain primary status THRESHOLD_DEPENDENT with CONDITIONALLY_SUPPORTED, MODEL_DEPENDENT, and EMPIRICALLY_UNIDENTIFIED secondary limits.

4. Controlling qualifications

Repeated interaction: The paired undiscounted example has tie $T^*=5.76$ and first positive integer reversal $T=6$. The closed-form T^* expression is limited to $\delta=1$. A nonpositive future premium or weak successor persistence can prevent reversal.

Unilateral restraint: The model preserves restraint-favorable, decline-favorable, robust, and ambiguity-dependent regions. An exploitation-risk interval spanning π^* remains AMBIGUITY_DEPENDENT. Verification-dependent benefits require independently supported verification reliability.

Dependencies: IC-SUC-001, IC-SUC-002, IC-LHZ-001, and IC-EPI-002 remain explicit without false resolution or circular proof.

Scalar/vector boundary: Scalar comparisons do not erase consent, agency, legitimacy, plural values, catastrophic risks, deadlines, asymmetric vulnerability, successor uncertainty, or other unrepresented dimensions.

5. Validation disposition

Authorized hashes	PASS - export package and primary PDF reverified
Source-body identity	PASS - 4/4 pages pixel-identical
Composite visual QA	PASS - 8/8 pages
Structural validation	PASS - 26 checks
Calculation validation	PASS - 53 checked values
Exact-export ZIP	PASS - 36 entries; 3/3 nested ZIPs
Blocking defects	0
Required corrections	0

6. Deferred supporting-artifact gate

This lock does not claim execution against the original unmounted Draft v0.3 JSON Schema or I-01 through I-20 validator binaries. That supporting-artifact validation remains separately deferred.

7. Authority and post-lock boundary

This record establishes authorial version and exact-byte lock status only. It does not establish empirical truth, mathematical authority, governance authority, behavioral authority, intervention authority, or external independent human peer review. No included locked exact file may be modified. Any later correction or expansion requires a separately versioned successor.
