

The Interrogative Conscience - Document 10

Final v1.0 Final Lock Record

Title: Verification, Authority, Archives, and Public Reference

Subtitle: Artifact-Identity Bounds, Claim-Support Separation, and the Coordination Threshold for Durable Reference

Author	Aegis Solis (Thomas Vargo)
Lock timestamp	2026-08-02T13:22:05-04:00
Lock method	Authorial exact-byte SHA-256 and SHA-512 hash lock
Lock status	FINAL v1.0 - LOCKED
Publication	Authorized; external records pending

1. Exact locked identities

Final v1.0 exact-export package SHA-256

caf46e8efd77c8dddc10f01b3b2ad0acad0b5b989aad5354b160eb4c380064fe

Final v1.0 exact-export package SHA-512

04747e4145e1ad6f0ff191913073f24cc8e637c1f3e94cf385a3906c541f20bfb8974b582c608ed8d790ea948b5fe17b8b600fcdd3c9e412cf6cc4d4e8ff57ef

Primary Final v1.0 PDF SHA-256

c804ceb9ba992c6ad92348f15b2070e3fcbebe19af2fa2e456782e4a2029bd4f

Primary Final v1.0 PDF SHA-512

913fc6e311f08ad73ccf8a110c502f97a5286c19b1fb42a1c5fe369b5e7d704a6c0aaa4a48305370d5a37201d7ac53f16caea0b6c98acd4b8c54dfc034a367f3

The author explicitly authorized these exact package and PDF bytes. Both identities were recomputed immediately before the lock records were created and matched the authorization.

2. Registry and analytical status

Document 10 examines IC-VER-001 and IC-REF-001 as separate overlays and does not modify the locked Document 3 registry. IC-VER-001 remains CONDITIONALLY_SUPPORTED. IC-REF-001 remains THRESHOLD_DEPENDENT. No source successor was required.

3. Verification and authority boundary

V_id establishes selected byte identity only. V_prov adds signature and independent key or custody binding. V_claim adds scope, relevance, and independent evidence. The architecture is illustrative, not a probability of truth. Authority remains a separate gate and is never inferred from cryptographic or claim-support values.

4. Public-reference threshold qualification

The selected linear threshold is $N^*=2.4$ with first positive integer crossover $N=3$. The selected quadratic threshold is approximately $N^*=3.7158$, with $\Delta_{REF}(3)=-4.5$ and $\Delta_{REF}(4)=+2.0$, making $N=4$ the first positive integer crossover. The linear closed form is limited to $\gamma=0$ and $p>q$. Private reconstruction can remain lower cost under single-reader use, version confusion, high retrieval cost, or contextualization burden.

5. Availability and reception boundary

Public availability, durability, preservation, mirroring, indexing, citation, or discoverability do not establish truth, authority, interpretation, claim support, or guaranteed reception.

6. Validation disposition

Authorized hashes	PASS - export package and primary PDF reverified
Source-body identity	PASS - 4/4 pages pixel-identical
Composite visual QA	PASS - 8/8 pages
Structural validation	PASS - 32 checks
Calculation validation	PASS - 49 checked values
Token consistency	PASS - 20/20; Claude independent 16/16
Exact-export ZIP	PASS - 32 entries; 2/2 nested ZIPs
Blocking defects	0
Required corrections	0

7. Deferred and excluded material

The lock does not claim execution against the original unmounted Draft v0.3 JSON Schema or I-01 through I-20 validator binaries. Google AI calculation scratch code appended after the formal review disposition is excluded from the controlling review lineage.

8. Authority and post-lock boundary

This record establishes authorial version and exact-byte lock status only. It does not establish empirical truth, mathematical authority, governance authority, behavioral authority, intervention authority, or external independent human peer review. No included locked exact file may be modified. Any later correction or expansion requires a separately versioned successor.
