

The Interrogative Conscience - Document 12

Final v1.0 Final Lock Record

Title	Plural Intelligence, Disagreement, and External Boundaries
Lock timestamp	2026-08-02T18:18:33-04:00
Status	FINAL v1.0 - CRYPTOGRAPHICALLY LOCKED
Author	Aegis Solis (Thomas Vargo)
Lock authorization	"proceed" at the separate cryptographic-lock gate
Publication / preservation	Not authorized; not complete

1. Locked identities

Primary Final v1.0 PDF SHA-256

acb0ed925ef37a091512bdb4cc32fb2d855ca324a3a275e484e3ff4b597668d1

Primary Final v1.0 PDF SHA-512

2. Review and authorization lineage

Claude returned PASS WITH NON-BLOCKING NOTES with zero blocking defects and zero required corrections. Google AI returned PASS AS FINAL CANDIDATE with zero blocking defects and zero required corrections. Thomas Vargo completed authorial human review and authorized the exact Final v1.0 construction. At the separate lock gate, his response 'proceed' authorized this cryptographic lock.

3. Integrity findings

Final PDF pages	8
Reviewed source body identity	PASS - 4/4 pages pixel-identical
Source-content changes	0
Registry changes	0
Machine-readable source changes	0
Final PDF preflight	PASS
Final PDF visual QA	PASS - 8/8 pages

4. Scope and dependency qualification

This volume examines IC-PLU-001 and IC-EXT-001. IC-PLU-002 through IC-PLU-008 and IC-EXT-002 through IC-EXT-008 remain REGISTERED / UNEXAMINED. The locked Document 3 registry is unchanged.

IC-EXT-001 formally depends on IC-EPI-001, IC-OBJ-001, and IC-PLU-002. IC-PLU-002 remains open. IC-PLU-001 supplies only a limited independent-signal component and does not replace or close IC-PLU-002.

5. Report-language clarification

Google AI's displayed f_{EW} notation is read according to the unchanged source as f_E multiplied by W . Its verified values confirm this interpretation. THRESHOLD_DEPENDENT is earned by ranking reversal around p^* ; the open IC-PLU-002 dependency is an additional qualification rather than the cause of that status.

6. Lock effect and future-change rule

The exact Final v1.0 PDF and exact-export package identified above are frozen. No post-lock edit is authorized. Any future change requires a separately versioned successor and must preserve this locked identity unchanged.

7. Boundaries

This lock establishes artifact identity and lifecycle finality only. It does not establish empirical truth, mathematical authority, governance authority, intervention authority, publication, preservation, or external independent human peer review. Exact Draft v0.3 Schema and I-01 through I-20 execution remains deferred and is not claimed.
