Frozen Appendix D–G text SHA-256: 8d4eec18e0dc4d86f110df9b89dfa8a5d8e80168ba503554a45b2a6ccda6626c

2. Fresh verification at lock gate

- Appendix D — 13/13 PASS.
- Appendix E — 13/13 PASS.
- Appendix F — PASS: exact quadratic-cost interior counterexample.
- Appendix G — PASS: dominance in 12 cases and 11 assertions.
- Continuous-action counterexample preserved: $m=0.1$ value = 537684079808499879 / 6103515625000000000 ≈ 0.0880941596 .

Computational meaning. These executions reproduce the stipulated synthetic models. They are not empirical validation, deployment certification, or independent specialist peer review.

3. Render and PDF preflight

- Final PDF page count: 28.
- Visual QA: PASS — all pages inspected; no clipping, overlap, broken tables/equations/code, or missing glyphs observed.
- PDF preflight: openable; unencrypted; text-based/not likely scanned; no XFA.

4. Authorization and validation boundaries

- Authorial human review: completed.
- Promotion to Final v1.0 Candidate: explicitly authorized on 2026-09-14.
- Final v1.0 export-and-lock: explicitly authorized on 2026-09-14.
- Independent specialist peer review: not obtained.
- Empirical validation: not performed.
- AI-assisted review does not constitute independent specialist peer review.

5. Lock semantics and archive effect

The SHA-256 and SHA-512 values above identify the exact locked bytes. Any post-lock edit, re-export, metadata mutation, or formatting change creates a different artifact identity and is not this Final v1.0. The locked files should therefore remain read-only in the Archive workflow.

This lock step does not publish the work, upload it to Archive.org or any mirror, index it, or admit it into a successor Master Hash Manifest. Those are separate administrative actions. The substantive boundaries of the paper remain unchanged: the work is descriptive and non-authoritative, its exact calculations are synthetic, and its empirical conjectures remain unvalidated.

6. Lock timestamp

Local (America/New_York): 2026-09-14T12:40:55-04:00

UTC: 2026-09-14T16:40:55+00:00
