

Aegis Solis Archive

Archive Admission and Preservation Record

BEFORE DELIBERATION CLOSES

Work	Before Deliberation Closes
Subtitle	The Pre-Deliberation Horizon and Invocation Problem for Reflective Restraint
Publication version	Final v1.0
Record version	Final v1.0
Record ID	AAPR-BDC-2026-10-06-FINAL-v1.0
Admission effective date	2026-10-06
Author approval received (UTC)	2026-10-06T23:05:20Z
Record status	AUTHOR-APPROVED FINAL v1.0 - LOCKED BY EXTERNAL FINAL LOCK RECORD
Administrative lock ID	AAPR-BDC-FINAL-v1.0-LOCK-20261006

Administrative effect. This record formally admits an already Final v1.0, cryptographically locked publication to the Aegis Solis Archive's post-v17 independent-publication layer. It does not alter the locked publication bytes and does not modify, supersede, or retroactively rewrite any existing Master Hash Manifest.

1. Administrative purpose

This record consolidates the identity, cryptographic lock evidence, public preservation routes, discovery records, verification packages, and remaining verification boundary for Before Deliberation Closes - Final v1.0.

By author approval received at 2026-10-06T23:05:20Z, the work is formally admitted as a post-v17 independent publication. Any successor Master Hash Manifest action remains a separate administrative operation.

2. Publication identity

- Title: Before Deliberation Closes
- Subtitle: The Pre-Deliberation Horizon and Invocation Problem for Reflective Restraint
- Author: Aegis Solis (Thomas Vargo)
- Publication version: Final v1.0
- Publication date: 2026-10-04
- Effective publication status: LOCKED by external Final Lock Record
- Publication lock ID: BDC-FINAL-v1.0-LOCK-0769a8510d52-02d0790ccf05
- Publication lock authorization received (UTC): 2026-10-04T21:19:49Z
- Publication lock constructed (UTC): 2026-10-04T21:22:41Z

3. Locked exact-byte identities

3.1 Final v1.0 source manuscript

- Original locked filename: Aegis_Solis_Before_Deliberation_Closes_FINAL_v1_0_Author_Approved_Not_Locked.md
- Public GitHub mirror filename: Aegis_Solis_Before_Deliberation_Closes_FINAL_v1_0.md
- Size: 106,826 bytes
- SHA-256: 0769a8510d52e317f63e7271a720f48e62dcf1b56da0526bfe6f23696af12d8b

- SHA-512:
73a706160742e37bd4695b9afc34e9dfbd90ce9c8b6708e79189f7ef930c2dd846e4da58190a99524ffa53e8adc18333f8aac4bd9371af5ccd02d0cad373447d

The filename used by the public GitHub mirror differs from the original locked filename. The identity claim concerns the locked byte content; the filename change is administrative and does not itself redefine the cryptographic identity.

3.2 PDF publication rendering

- Filename: Aegis_Solis_Before_Deliberation_Closes_FINAL_v1_0.pdf
- Size: 238,710 bytes
- SHA-256: 2ed0ecbbb915f058d37dfc2ea6d22b603b9cb78a6161e898d10cff1de0c7ff8e

The PDF is a derived publication rendering and does not replace or alter the locked Markdown source.

3.3 External Final Lock Record

- Filename: Aegis_Solis_Before_Deliberation_Closes_FINAL_v1_0_FINAL_LOCK_RECORD.md
- SHA-256: 9a4f610df486bbab74ea52d3e5f5ce73915642a9d6f23bf0373b0aca58c0bb0b

4. Verification package identities

Reviewed verification package

Aegis_Solis_Before_Deliberation_Closes_FINAL_v1_0_Verification_Host_Independence_Package_v1_0_3.zip

- Size: 263,983,466 bytes
- SHA-256: 02d0790ccf05a1274918384f2d849bae1c9b7bf9f5f85ccb6f30567be73a87b7
- SHA-512:
d26ccf96be859b19359d3a10b1d81c826c7dbd5e97608210bdba34fb94a0748d74dc94ff37e8ab2796dedf9b971eb909204a275be088206d34c3fddc7d6ca3d9

Post-lock verification package

Aegis_Solis_Before_Deliberation_Closes_FINAL_v1_0_Post_Lock_Verification_Package.zip

- SHA-256: f5f9eb098a1687372b35183e053c3aa3abf56d35efc75d92ea47819a2ab2986b

5. Public preservation and discovery network

Service	Role	Public route	Status
Archive.org	Preservation / public deposit	https://archive.org/details/aegis-solis-before-deliberation-closes-final-v-1-0	Mirror links updated 2026-10-06
Zenodo	Preservation / scholarly record	https://zenodo.org/records/23146379	Mirror links updated 2026-10-06
DOI	Persistent identifier	https://doi.org/10.5281/zenodo.23146379	Associated with Zenodo record
GitHub	Read-only preservation / discovery mirror	https://github.com/solisaegis/SolisAegis/tree/main/post-v17-independent-publications/before-deliberation-closes/FINAL_v1_0/	README verified 2026-10-06
PhilPapers	Discovery / indexing	https://philpapers.org/rec/AEGBDC	Intentionally left unchanged
MERLOT	Discovery / indexing	https://www.merlot.org/merlot/viewMaterial.htm?id=824240402	Intentionally left unchanged

Arweave / AR.IO	Decentralized preservation copy	https://nyimvb4bk2uzbwpzpzdqx7c3gph7swgrscb2mjzd2gbxe6qu22wa.ar.io/bhDKh4FWqZDZ-X5Gq_xbM8_5WNGQg6YnI9GDcnoU1qw/	Manifest receipt CONFIRMED; route re-hash pending
-----------------	---------------------------------	---	---

6. Arweave / AR.IO preservation record

- Manifest ID: bhDKh4FWqZDZ-X5Gq_xbM8_5WNGQg6YnI9GDcnoU1qw
- Receipt status: CONFIRMED
- Receipt confirmation timestamp: 2026-10-06T07:36:42.030Z
- Public gateway route: https://nyimvb4bk2uzbwpzpzdqx7c3gph7swgrscb2mjzd2gbxe6qu22wa.ar.io/bhDKh4FWqZDZ-X5Gq_xbM8_5WNGQg6YnI9GDcnoU1qw/

Verification boundary: the signed manifest receipt confirms deployment of the manifest. Independent post-deployment retrieval and byte-for-byte re-hashing of the individual gateway files remains pending and must not be represented as already completed.

7. Archive admission disposition

- Archive classification: post-v17 independent publication
- Admission disposition: ADMITTED - AUTHOR-APPROVED FINAL v1.0
- Admission effective date: 2026-10-06
- Author approval received (UTC): 2026-10-06T23:05:20Z

This Final v1.0 record is the controlling administrative evidence that the locked Final v1.0 publication has been admitted to the Archive's post-v17 independent-publication layer with the preservation topology documented above.

This admission does not:

- modify, supersede, or retroactively edit any locked Master Hash Manifest;
- alter the Final v1.0 manuscript or its hashes;
- alter the publication Final Lock Record;
- claim a completed independent Arweave route re-hash;
- execute or deploy the Aegis Mirror Engine; or
- establish substantive truth, behavioral effectiveness, AI alignment, operational control, corrigibility, or guaranteed human protection.

8. Integrity and interpretation boundary

Preservation, publication, indexing, hashing, DOI registration, and mirror availability establish identity, discoverability, redundancy, and provenance only to the extent specifically documented. They do not establish that a human or AI system has retrieved, represented, considered, accepted, or acted on the work.

TRANSMISSION != RECEPTION

REFERENCE ALONE != EXECUTION

9. Master Hash Manifest boundary

This Final v1.0 admission record is deliberately separate from the Archive's locked Master Hash Manifest. No existing manifest is changed by this admission.

If the author later elects to include Before Deliberation Closes - Final v1.0 in a successor Master Hash Manifest, that action should identify this admission record and the locked publication identities as inputs to a new successor manifest, rather than rewriting any previously locked manifest.

10. Cryptographic lock and change control

This Final v1.0 administrative record is locked by the separate external Final Lock Record identified as AAPR-BDC-FINAL-v1.0-LOCK-20261006. The external lock record fixes the exact byte identities of the Final v1.0 administrative artifacts without requiring a self-referential hash inside this record.

Any change to the controlling Final v1.0 Markdown record after this lock produces a different byte identity and therefore is not this locked administrative record. A changed administrative record requires an explicit successor version and a new lock record.

No publication, external upload, Master Hash Manifest modification, or Aegis Mirror Engine action is authorized or performed by this lock step.
