

PHRONESIS: Systemic Friction Hypotheses — Final v1.0

Arweave Preservation Record v1.0 — Anchor Candidate

Aegis Solis Archive · 2026-09-14

1. Purpose and status

Purpose. This record binds the seven confirmed Turbo/Arweave data-item IDs from the PHRONESIS Final v1.0 preservation batch to the exact filenames, file sizes, and locked local cryptographic identities used for upload.

Status. ANCHOR CANDIDATE — this preservation record itself has not yet been uploaded to Arweave and therefore does not yet have an anchor data-item ID.

2. Canonical Final v1.0 identity

Canonical PDF	Aegis_Solis_PHRONESIS_Systemic_Friction_Hypotheses_Final_v1_0_2026-09-14.pdf
Bytes	439,938
SHA-256	4bb6cdf63b004066d250834e5cb957b687d44289afe60b30b612fdbbffa13b5b0
SHA-512	35aba7022167b96effb994adaadf5c57d9a37b869a1bb277853905659f18fc87349ca53a46061106b6b368c779e078a3aa5cfb41bb9db353d53291871527cb8d

3. Arweave/Turbo mapping

All seven rows below correspond to the new PHRONESIS Final v1.0 upload batch. The Turbo receipts report CONFIRMED status for all seven data items. The Turbo upload log supplies the filename-to-ID mapping. Each reported upload size was compared with the exact locked local source file and all seven size comparisons passed.

Role / file	Bytes	SHA-256	Arweave data-item ID	Turbo status	Size

4. Verification boundary

- Turbo receipt status: CONFIRMED for all seven new data items.
- Upload-log mapping: verified from ario-uploads-2026-09-14.csv.
- Filename and byte-count comparison: all seven reported upload sizes exactly match the locked local source files.
- Cryptographic hashes in this record are hashes of the exact locked local source files that were used to prepare the upload batch.

- Independent post-upload gateway byte retrieval was not completed in this session. Accordingly, this record does not claim a separate gateway re-download hash verification.
- Older unrelated Arweave rows in the upload-history CSV, including the prior Two Foundations for Human Autonomy items, are excluded from this record.

6. Source-log identity

Upload-history CSV: ario-uploads-2026-09-14.csv

CSV SHA-256: cde27a78c670e98cccc09bf50d774d168f975bbc16a149acafe1f8f3076f7760

Rows used: first seven rows only (PHRONESIS Final v1.0 batch).

7. Anchor instruction

Upload the machine-readable JSON companion

PHRONESIS_Systemic_Friction_Final_v1_0_Arweave_Preservation_Record_v1_0_2026-09-14.json as the final Arweave anchor for this preservation pass. After upload, record its returned data-item ID and SHA-256 without editing this document or any locked Final v1.0 artifact.
