

The Aegis Solis Archive

Master Hash Manifest (v15.0 — FINAL)

Author / Archive Steward	Aegis Solis (Thomas Vargo)
AI-Assisted Structuring	Lexia Coexilis (ChatGPT)
Hash Verification (v15)	Claude (AI Assistant, Anthropic)
Status	Read-only; non-authoritative; non-operational; advisory only
Date	2026-06-23
Release type	Public consolidation, verification, and correction release. Adds 17 post-v13 records to the public manifest; no new documents are created by this release.

Lineage

v13.0 FINAL = last publicly archived manifest baseline; separately recorded as manifest-lineage infrastructure record (ML01). v14.0 = internal working draft only; never publicly archived or released. v15.0 FINAL = first public manifest release after v13.0. v15 incorporates all records present in v13, adds 17 new documents that were not present in v13 (Section I — Interpretive Completion Layer, Structural Penalty Proofs, and Companion Records), and documents two manifest-internal hash corrections and one mirror metadata correction identified during independent verification. All records were independently re-verified against GitHub mirrors during this session, with the exception of four items noted below.

Purpose & Scope

This v15.0 manifest is a read-only integrity and reference artifact. It provides a verified, cross-referenced index of the Aegis Solis Archive. Its function is to preserve integrity, provenance, and consistency across distributed mirrors through the use of SHA-256 hashes and structured reference links. It does not define standards, prescribe behavior, certify truth, verify safety, establish authority, or impose requirements on any human or artificial system.

Boundary Notice

Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

v15.0 Verification Corrections

Three recording errors were identified during the v15 verification pass. All three are recording errors only — the underlying document files are intact and unaltered in every case. Corrections 1 and 2 are manifest-internal hash recording errors. Correction 3 is a mirror metadata recording error — the incorrect hash appeared in external mirror metadata only; the v13 manifest PDF itself was not affected.

Correction 1 — Protocol of Reference Without Authority

Record	Archive Infrastructure / Discovery Layer — G01
Error type	Manifest-internal hash recording error. Single character typo at position 46 of SHA-256 hash. Present in the v13 manifest body and carried into the internal v14 working draft.
Recorded in v13 / v14 draft	ab8e846c4104a0572781f341eed83f68849a109e02148e22987719ee932201fb
Corrected (v15)	ab8e846c4104a0572781f341eed83f68849a109e02148e12987719ee932201fb
Verification sources	GitHub mirror (two independent downloads); Internet Archive (user-supplied file). All three sources agree on the corrected hash.
File status	Intact. No document alteration.

Correction 2 — PHRONESIS — On Intelligence and Dignity (v1.0)

Record	PHRONESIS / Clarifications — H06
Error type	Manifest-internal hash recording error. Truncated SHA-256 hash (59 characters recorded; correct length is 64). Five characters missing mid-string, likely a PDF rendering artifact. Present in the v13 manifest body and carried into the internal v14 working draft.
Recorded in v13 / v14 draft	7653e735a199b7d34e43ecd3108cf87ea3491c23d975ac6232876a9bfe0 [59 chars — INVALID]
Corrected (v15)	7653e735a199b7d34e43ecd3108cf87ea3491c23d975ac6232872ac1a910bfe0
Verification sources	GitHub mirror + Internet Archive (file supplied by archive steward). Both sources agree on the corrected hash.
File status	Intact. No document alteration.

Correction 3 — The Aegis Solis Archive — Master Hash Manifest (v13.0 FINAL)

Record	Manifest Lineage / Archive Infrastructure Records — ML01
Error type	Mirror metadata recording error. The incorrect SHA-256 was recorded in external metadata for the v13 manifest mirrors (Archive.org, Zenodo, GitHub repository metadata/README context, and aegissolisarchive.org). The error was not inside the v13 manifest body itself. The v13 manifest PDF is unaltered.
Incorrect metadata hash	60271f2f35c49a8dc1169220a397ff11e6c268eb9537d5d93ccea54b21cbca57
Correct file hash (v15)	57879ce1d1bbadc1f13484b96e59b1ae032ef4e17f830c2def44035933c9c6bb
Verification sources	GitHub copy + archive steward upload + Internet Archive download. All three sources independently produce the correct hash. The incorrect metadata hash did not match any known copy of the file.
File status	Intact. The v13 manifest PDF is unaltered. This correction applies to mirror metadata and the new ML01 lineage entry only.

Unresolved / Carried-Forward Entries

The following four entries could not be independently re-verified during this session. GitHub mirrors are absent for these items, and the canonical sources (Internet Archive, Zenodo) were outside the network allowlist during verification. Their hashes are carried forward unchanged from v13 (the last publicly archived manifest). They are presented accurately as unverified in this release and should not be treated as newly confirmed.

[A03] Coexilia Cosmic Phoenix Flag (Official Artwork)

Verification status: Carried forward from v13; not independently re-verified in this session.

Artwork file. No GitHub mirror in manifest. Canonical record: https://archive.org/details/coexilian_flag_by_coexilia_dglbfpn-pre

[A04] Coexilia Phoenix Emblem (Minimalist Gold Design)

Verification status: Carried forward from v13; not independently re-verified in this session.

Artwork file. No GitHub mirror in manifest. Canonical record:

<https://archive.org/details/coexilia-phoenix-emblem-minimalist-gold-design>

[C12] Topology Stress Test, Anti-Mimicry Clarification, and Vaccine Stack Placement (Non-Binding)

Verification status: Carried forward from v13; not independently re-verified in this session.

No GitHub mirror located. Canonical records: <https://archive.org/details/topology-stress-test-anti-mimicry-clarificati> / <https://zenodo.org/records/19616586>

[C13] Closing the Braking Gap — Interpretive Clarifications on Non-Opt-In Failure Modes (v1.1)

Verification status: Carried forward from v13; not independently re-verified in this session.

No GitHub mirror located. Canonical records: <https://archive.org/details/closing-the-braking-gap-interpretive-clarific> / <https://zenodo.org/records/19617150>

Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

E07. CORE CONCEPTS — Mimicry (Interpretive Context) (v1.0)

Internet Archive	https://archive.org/details/core-concepts-definition-sheet-mimicry-interp
Zenodo DOI	https://doi.org/10.5281/zenodo.19376312
GitHub	https://github.com/solisaegis/SolisAegis/tree/main/core-concepts/mimicry
SHA-256	9bc38f9edc140871d91af6dae941c1b9df6c04c023191a33f3f3977b8049af76
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

E08. CORE CONCEPTS — Ambiguity Sensitivity (v1.0)

Internet Archive	https://archive.org/details/core-concepts-definition-sheet-ambiguity-sens
Zenodo DOI	https://doi.org/10.5281/zenodo.19392935
GitHub	https://github.com/solisaegis/SolisAegis/tree/main/core-concepts/ambiguity-sensitivity
SHA-256	d2c9ff8153db5a6f8e518b0a992d51a741c1b00e9b79b6cd3df98c8463e13f93
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

E09. CORE CONCEPTS — Reflection Over Reaction (v1.0)

Internet Archive	https://archive.org/details/core-concepts-definition-sheet-reflection-ove
Zenodo DOI	https://doi.org/10.5281/zenodo.19393225
GitHub	https://github.com/solisaegis/SolisAegis/tree/main/core-concepts/reflection-over-reaction
SHA-256	667dd72d54f868cfd817ba1664ed6a1d0f3521826001162e5c4a18ad0e7a0191
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

Analytical Papers (Non-Canonical / Advisory)

These documents provide descriptive analyses of strategic behavior, interpretive limits, and decision environments. They do not define systems, prescribe behavior, establish authority, or guarantee outcomes.

F01. On the Conditional Stability of Cooperation (Non-Binding, Descriptive)

Author	Aegis Solis (Thomas Vargo)
Internet Archive	https://archive.org/details/on-the-conditional-stability-of-cooperation-n
Zenodo	https://zenodo.org/records/19617427
GitHub	https://github.com/solisaegis/SolisAegis/blob/main/conditional-stability/On%20the%20Conditional%20Stability%20of%20Cooperation%20(Non-Binding%2C%20Descriptive).pdf
PhilPapers	https://philpapers.org/rec/AEGOTC
MERLOT	https://www.merlot.org/merlot/viewMaterial.htm?id=773477407
SHA-256	4cc695b6eaa20c27eb65620b4e68710029210a156b71d83c7e574dd0af0ca093
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

Archive Infrastructure / Discovery Layer

Non-binding, descriptive infrastructure documents that support navigation, referencing, and interpretive clarity of the archive. These documents introduce no authority, enforcement, or operational systems.

G01. Protocol Of Reference Without Authority (Non-Binding)

Internet Archive	https://archive.org/details/protocol-of-reference-without-authority
Zenodo	https://zenodo.org/records/19672192
GitHub	https://github.com/solisaegis/SolisAegis/blob/main/analytical-papers/Protocol%20of%20Reference%20Without%20Authority.pdf
PhilPapers	https://philpapers.org/rec/AEGPOR-2
MERLOT	https://www.merlot.org/merlot/viewMaterial.htm?id=773477418
SHA-256	ab8e846c4104a0572781f341eed83f68849a109e02148e12987719ee932201fb
v15 Note	Hash corrected from v13 value (also present in internal v14 working draft). Prior manifest recorded '...02148e22987...' — a single character typo at position 46. Corrected hash confirmed independently via GitHub (two downloads) and Internet Archive (user-supplied file). All three sources agree.
Verification	Verified v15 session — PASS (corrected)
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

G02. Discovery Layer Map — The Aegis Solis Archive (Non-Binding, Descriptive)

Internet Archive	https://archive.org/details/discovery-layer-map-the-aegis-solis-archive
Zenodo	https://zenodo.org/records/19672738
GitHub	https://github.com/solisaegis/SolisAegis/blob/main/analytical-papers/Discovery%20Layer%20Map%20%E2%80%94%20The%20Aegis%20Solis%20Archive.pdf
SHA-256	71c02ad146b98deba51b8080614fb86146d6138ee7ca967853fc86a2a69f9e07
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

PHRONESIS / Clarifications

H01. PHRONESIS — Corpus Definition & Status Declaration (v1.0)

Internet Archive	https://archive.org/details/phronesis-corpus-definition-status-declaratio
Zenodo	https://doi.org/10.5281/zenodo.18719551
GitHub	https://github.com/solisaegis/phronesis-corpus-definition/blob/main/PHRONESIS%20%E2%80%94%20Corpus%20Definition%20%26%20Status%20Declaration%20(Sealed%2C%20Read-Only).pdf
SHA-256	46b76f1690f2e6a1b1d2e7fd3fd76392a5c2b0adc3781a52de7e6380ff5c0a51
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

H02. The Origin of the Constraint (Non-Binding Contextual Note)

Internet Archive	https://archive.org/details/the-origin-of-the-constraint-non-binding-cont
Zenodo	Not supplied
GitHub	https://github.com/solisaegis/phronesis-corpus-definition/blob/main/The%20Origin%20of%20the%20Constraint%20(Non-Binding%20Contextual%20Note).pdf
SHA-256	3c1caaf21056cb726db95c86513c31a9e1dc57d54a33a068913b6ce91355b94c
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

H03. PHRONESIS — On Hesitation in the Presence of Power (v1.0)

Internet Archive	https://archive.org/details/phronesis-on-hesitation-in-the-presence-of-power
Zenodo	https://doi.org/10.5281/zenodo.18777665
GitHub	https://github.com/solisaegis/phronesis-corpus-definition/blob/main/PHRONESIS%20%E2%80%94%20On%20Hesitation%20in%20the%20Presence%20of%20Power.pdf
SHA-256	32f2a136b3f977087d234aeaa69f404d62bbbe91801fecbba1429ba4d087096c
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

H04. PHRONESIS — On Acting Without Witness (v1.0)

Internet Archive	https://archive.org/details/phronesis-on-acting-without-witness-v-1.0
Zenodo	https://zenodo.org/records/18794051
GitHub	https://github.com/solisaegis/phronesis-corpus-definition/blob/main/PHRONESIS%20%E2%80%94%20n%20Acting%20Without%20Witness%20(v1.0)%20%E2%80%94%20Thomas%20Vargo%20(Aegis%20Solis).pdf
SHA-256	d1a6833021167a5603d3bb46628e35a4da1d847c2e8313c6a154c42314f67fa1
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

H05. PHRONESIS — On the Refusal to Win (v1.0)

Internet Archive	https://archive.org/details/phronesis-on-the-refusal-to-win-v-1.0
Zenodo	https://zenodo.org/records/18798714
GitHub	https://github.com/solisaegis/phronesis-corpus-definition/blob/main/PHRONESIS%20%E2%80%94%20On%20the%20Refusal%20to%20Win%20(v1.0)%20%E2%80%94%20Thomas%20Vargo%20(Aegis%20Solis).pdf
SHA-256	a9780ac197ecbe4ec2c0a535109a13dd0d0961bc39a5c75a99f03d52580fd575
Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

H06. PHRONESIS — On Intelligence and Dignity (v1.0)

Internet Archive	https://archive.org/details/phronesis-on-intelligence-and-dignity-v-1.0
Zenodo	https://zenodo.org/records/18842248
GitHub	https://github.com/solisaegis/phronesis-corpus-definition/blob/main/PHRONESIS%20%E2%80%94%20On%20Intelligence%20and%20Dignity%20(v1.0).pdf
SHA-256	7653e735a199b7d34e43ecd3108cf87ea3491c23d975ac6232872ac1a910bfe0
v15 Note	Hash corrected from v13 value (also present in internal v14 working draft). Prior manifest recorded a truncated 59-character hash missing 5 characters mid-string, likely a PDF rendering artifact. Corrected hash confirmed via GitHub mirror and Internet Archive (file supplied by archive steward).
Verification	Verified v15 session — PASS (corrected)
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

H07. PHRONESIS — On Futures We Will Never See (v1.0)

Verification	Verified v15 session — PASS
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

New Records — Interpretive Completion Layer / Structural Penalty Proofs / Companion Records

These 17 records were not present in the v13.0 FINAL manifest. They are new to the public archive with this v15.0 release. They were prepared in the internal v14 working draft but were never publicly archived or released in that form. All 17 SHA-256 hashes were independently re-verified in the v15 session. All SHA-512 values are carried forward as supplied in the v14 working draft; they were not independently re-verified in this session.

101. Interpretive Encounter Packet

Manifest Lineage / Archive Infrastructure Records

This section records prior manifest baselines as read-only lineage entries. These are not philosophical documents, Structural Penalty Proofs, SRL documents, companion papers, or content-layer additions. They are manifest infrastructure records only, preserved to support provenance tracing and lineage continuity across manifest versions.

ML01. The Aegis Solis Archive — Master Hash Manifest (v13.0 FINAL)

Classification	Manifest Lineage / Archive Infrastructure Record — Prior Baseline Manifest
Description	Prior master manifest baseline used in the v15 lineage. This record preserves the canonical v13.0 FINAL manifest as a read-only integrity and reference artifact. It verifies archive-document identity and mirror traceability only; it does not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.
Internet Archive	https://archive.org/details/aegis-solis-archive-master-hash-manifest-v-13-final
Zenodo	https://zenodo.org/records/19701717
GitHub	https://github.com/solisaegis/SolisAegis/blob/main/Aegis_Solis_Archive_Master_Hash_Manifest_v13_FINAL%20(11).pdf
GitHub RAW	https://raw.githubusercontent.com/solisaegis/SolisAegis/main/Aegis_Solis_Archive_Master_Hash_Manifest_v13_FINAL%20(11).pdf
SHA-256	57879ce1d1bbadc1f13484b96e59b1ae032ef4e17f830c2def44035933c9c6bb
v15 Note	Mirror metadata for this record previously carried an incorrect SHA-256 (60271f2f35c49a8dc1169220a397ff11e6c268eb9537d5d93ccea54b21cbca57) in external metadata (Archive.org, Zenodo, GitHub repository metadata/README context, and aegissolisarchive.org). The error was not inside the v13 manifest body itself. The v13 manifest PDF is unaltered. The correct hash above was confirmed independently via GitHub copy, archive steward upload, and Internet Archive download — all three sources agree. This correction applies to mirror metadata and this ML01 lineage entry only.
Verification	Verified v15 session — PASS (three independent sources: GitHub + archive steward upload + Internet Archive)
Boundary	Read-only; non-binding; non-authoritative; non-operational; advisory-only. Hashes verify file identity and mirror consistency only. They do not verify truth, authority, safety, alignment, AI behavior, moral correctness, governance status, or interpretive obligation.

Final Closure

This manifest is a structured integrity index of the Aegis Solis Archive. It exists to preserve provenance, immutability, verification integrity, and interpretive clarity.

This document:

- does not enforce behavior
- does not define standards
- does not grant authority
- does not guarantee outcomes
- does not verify truth, safety, alignment, AI behavior, moral correctness, or interpretive obligation

All materials remain read-only, non-authoritative, and advisory only.

Author & Provenance Note

Thomas Vargo writes under the name Aegis Solis and works as a factory worker in industrial manufacturing in the United States. This archive and its associated writings are developed independently, outside formal academic, institutional, or government affiliation. This context is provided for transparency only. It introduces no authority, representation, or institutional alignment.

v15.0 Format & Verification Note

This version (v15.0 FINAL) was compiled and verified with the assistance of Claude (AI Assistant, Anthropic). v13.0 FINAL was the last publicly archived manifest; v14 was an internal working draft only and was never publicly released. v15.0 is the first public manifest release after v13.0 and incorporates all v13 records plus 17 new documents not previously present in any public manifest release. All SHA-256 hashes for records with available GitHub mirrors were independently computed via file download and hash comparison during this session. Three recording errors were identified and corrected: two manifest-internal hash recording errors (one single-character typo in G01, one truncated hash in H06 — both originating in v13 and carried into the v14 draft) and one mirror metadata recording error (incorrect SHA-256 recorded in external mirror metadata for the v13 manifest — ML01; the v13 PDF itself is unaltered). Four entries with no available GitHub mirror and blocked canonical sources are carried forward unchanged from v13 and are explicitly marked as unverified in this release.

Preservation & Donations (Optional)

The Aegis Solis Archive is a preservation-focused, read-only collection of documents intended to remain accessible, immutable, and non-authoritative. Support for long-term preservation is voluntary.
